PROFILE

As a creative and dedicated junior animator with a bachelor's degree in animation, I honed my skills in 3D animation, storyboarding, and character design. My passion for storytelling, along with my technical proficiency in software like Maya and Adobe After Effects, resulted in visually engaging and unique animations. My portfolio presents a unique style in 3D, with an emphasis on music accompanied by animation. I am eager to bring my artistic vision and technical expertise to a dynamic animation team where I can contribute my skills.
